

ÁLVARO PARADA

FULL STACK DEVELOPER

I'm a full stack developer with 2 years of experience, focused on clean code and best practices. My technical expertise lies in the MERN stack, primarily using TypeScript or JavaScript, and I prioritize testing to ensure the reliability and functionality of my applications. My engineering background brings a strong emphasis on collaboration, analytical thinking, and adaptability.

I am always eager for new opportunities to learn and grow, and I am open to new challenges in the industry.

Education

Full Stack Web Development Bootcamp

ISDI Coders
jul. – dic. 2022

Master's degree in Management Engineering

Universitat Politècnica de Catalunya –
ESEIAAT
2018 – 2021

PLC programming

Centro de Investigación y Formación en
Electricidad y Electrónica – CIFEE
2017 – 2018

Degree in Industrial Electronic Engineering and Automatic Control Systems

Universidad de Cantabria – ETSIIT
2010 – 2017

Skills

Soft Skills

Team player, Analytical thinking,
Flexibility, High organizational
skills, Learnability

Technical Skills

Typescript, Javascript, Python, Jest,
Cypress, React, NextJs, Redux,
HTML5, CSS3, NodeJS, Git, Github,
MongoDb, MySQL, GraphQL, Figma,
Agile

Languages

- Spanish(native)
- English (B2)

Work Experience

Full-stack developer

ESTOKO Logistics | April 2023 – now

- Contributed to the development of an innovative operational tool utilizing new technologies like PostgreSQL, Next.js, Apollo GraphQL and Prisma, focusing on frontend development while providing occasional backend support to ensure a well-rounded approach.
- Maintenance of many applications, prioritizing frontend optimization and user interface enhancements for a seamless user experience.
- Collaborated closely with the technical lead and project manager to ensure an efficient team coordination in an Agile methodology, maintaining a highly productive work environment.

Full Stack developer

Freelance | Sept. 2022 – Dic. 2022

- Developed SPAs using MERN stack, with Redux to manage global state.
- Worked with a team of full stack developers and a Tech Lead using agile management to build an app incorporating best practises.
- Created integration and unit tests.

Junior Engineer

OXIGEN Salud | Jun. 2022 – Sept. 2022

- Continuously improved production process, while optimizing storage and production layouts.
- Stock and order control through Excel spreadsheets automatization.
- Improvement of web components.

Quality and Logistic Engineer

SEUR GEOPOST | Feb. 2020 – Sept. 2020

- Developed and implemented a project about a logistic improvement of refrigerated deliveries temperature control.
- Created a new procedure for PDA's usage.
- Executed 5s methodology and fixed logistic problems.
- Improved stock control by automating spreadsheets.
